

ABSTRACT

AL-V-296

MASON-DIXON LINE: MILESTONE NO. ---(174)
Wellersburg, Pennsylvania
Public/private

1766/1767 (area surveyed/marked)
1902 (new monument set at
additional site)

Milestone No. ---(174) at the south edge of Wellersburg, about 4000 feet west of the preceding monument No. ---(173) on the western slope of Little Allegheny Mountain, marks an additional point on Mason and Dixon's ^{230.228-mile} West Line. It is a very plain dressed Cockeysville marble post with a low pyramidal top, of the same design and source as 65 other new monuments set during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary west of Sideling Hill. It is in very good condition, unaltered, firmly set; measures about 10 1/4 inches square by about 1 foot high above ground; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1766 on the east side (when this area was preliminarily surveyed), and 1902 on the west side (when this ^{established and} new site was first/monumented). No. ---(174) is significant on the national and state levels primarily as one of the thematic group series of some 248 markers still visually defining the ^{provincial} West Line, the boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. Locally, as one of 37 monuments marking the present Allegany/Fulton-Bedford-Somerset county boundary, it is also significant symbolically for its identifiable relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. ---(174) was a new monument when set in 1902 at an additional site on Mason and Dixon's West Line during the course of the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It is a very plain dressed Cockeysville marble post with a low pyramidal top; is in very good condition, firmly set, unaltered; measures about 10 1/4 inches square by about 1 foot high above ground; and is embellished only by the capital letter P on the north side facing Pennsylvania, M on the south side facing Maryland, the year 1766 on the east side (when this area was preliminarily surveyed) and 1902 on the west side (when this new site was first monumented).

The area here is the southern edge of the village of Wellersburg, PA, a settlement mostly strung along MD 47/PA 160 at the western base of Little Allegheny Mountain and the cleared foothills of Big Savage Mountain to the west. The site is in the southeast corner of the junction of T-766 with MD 47/PA 169, in the mowed side yard of the Michaels family home, about 5 feet from the roads, slightly above ^{easily seen from the roads all seasons} grade level, but not marked or protected in any way, except by the ^{surrounding} property owners. The site is within Election District 13 of Allegany County, MD, and Southampton Township of Somerset County, PA; about 4000 feet west of the preceding monument No. ---(173) on the western slope of Little Allegheny Mountain.

The monument, identical to 65 other monuments of 1902 set west of Sideling Hill along the Maryland-Pennsylvania boundary, was quarried and carved in Cockeysville, MD, of a white, fine-grained marble called saccharoidal dolomite or magnesian limestone; was originally cut about 10 inches square by about 4 1/2 feet long, intended for setting about 1 1/2 feet above ground with the remaining 3 feet for setting firmly into the ground when possible. The letters and numbers are clocky, V-sunk without serifs, and are horizontally aligned as a band around the stone near the top. These, and the top planes and apex are all clear and intact, although there is a chip out of the top southwest corner and a few other nicks along the edges and top northwest corner.

(see Thematic Group National Register nomination form for full descriptions of the several kinds of new monuments set in 1902 and the Resurvey method of

STATEMENT OF SIGNIFICANCE

Milestone No. ---(174) is significant on the national and state levels primarily as one of the thematic group series of some 248 markers still visually defining Mason and Dixon's West Line, the 230.228-mile provincial boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. This part of the Line was preliminarily surveyed in 1766, marked at irregular intervals with cairns and additional wood posts the following year, and the present new site on the Line established and monumented in 1902 with a new Cockeysville marble marker during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Locally, as one of 37 markers along the present Allegany/Fulton-Bedford-Somerset county boundary, No. ---(174) is also significant for its symbolic relationship to the colonial and Civil War heritage of these counties.
